B2F 868 MHZ HF RECEIVER

INFORMATIONS PRODUIT

Référence : FD-020-191

Protocoles : 2 fils

Technologies : 868MHz

DESCRIPTION

The B2f 868 MHz HF receiver has been designed to work with FDI access control systems.
It is compatible with the following bi-technology remote controls:

- TM04 (125 KHz tag integrated / 433 MHz yellow keys
- TELROL (including 868 Mhz tag) / 868 MHz

The remote controls also have an integrated tag (125 KHz or Mifare 13.56 MHz). One of the advantages of the system is that proximity readers also transmit the same serial number to the controller.

KEY CHARACTERISTICS

- Size (L x l x h) : 155 mm x 91 mm x 34 mm
- Protection rating: IP67
- Wiring: 2-wire
- 1 loop input
- Operating temperature: -20°C to +60°C
- Power supply: 12-24V (supplied by the controller)
- Reception distance: Up to 100 m in open-field conditions
